Experience

Nexaprime PVT LTD. **May 2026 – Present**

Backend Developer Intern

- Spearheaded the architectural decoupling of the Merchant Dashboard BFF by replacing direct database dependencies with internal HTTP-based service communication, improving service autonomy and scalability.
- Refactored API Gateway routing using declarative route configurations, simplifying controller logic and streamlining onboarding of new services.
- Enhanced event-driven communication by implementing versioned Kafka message envelopes, ensuring backward compatibility and robust metadata handling across 10+ distributed microservices.
- Developed and maintained microservices spanning Auth, Orders, Payments, and Communications using Nest.JS, TypeScript, MongoDB, and Apache Kafka, enabling scalable and reliable asynchronous workflows.

Projects

AI BioScan – Intelligent Health Risk Assessment System | *React.js, Python, PostgreSQL, AI/ML*

- Developed a full-stack AI-powered health risk assessment platform using React.js, Python, and PostgreSQL.
- Integrated machine learning models for symptom analysis and real-time health risk prediction with personalized recommendations.
- Designed secure REST APIs, optimized PostgreSQL queries, and built responsive dashboards for health analytics and automated report generation.

YouTube Video Summarizer | *React.js, Node.js, OpenAI/Gemini API*

- Built an AI-powered application that generates concise summaries from YouTube videos using LLMs.
- Implemented transcript chunking and asynchronous processing for videos longer than 60 minutes.
- Optimized backend APIs and frontend rendering to improve application responsiveness.

Text-to-Image Generator | *React.js, Flask, Stable Diffusion, Docker*

- Developed a Generative AI web application using Stable Diffusion for text-to-image generation.
- Reduced response latency through caching and optimized React state management.
- Containerized backend services with Docker for scalable deployment.

Technical Skills

Programming Languages	JavaScript, TypeScript, Python, SQL
Backend	Node.js, Nest.js, Express.js, REST APIs, Mirco-services Architecture
Frontend	React.js, HTML, CSS, Tailwind CSS
Databases	MongoDB, MySQL, PostgreSQL, Firebase
Cloud & DevOps	AWS, Docker, Git, GitHub Actions
Core CS	DSA, OOP, DBMS, Operating Systems, Computer Networks, System Design

Education

B.Tech in Computer Science	**KIT's College of Engineering, Kolhapur** (CGPA: 7.75)	2022 – 2026
HSC (Class XII)	**The New College, Kolhapur**	2021 – 2022
SSC (Class X)	**Maharashtra High School, Kolhapur**	2019 – 2020

Achievements & Certifications

- Institute level Project Based Learning Competition Winner (3rd Sem)
- AWS: Certified Cloud Architecting.
- Google - Google Cloud Career Launchpad Generative AI Leader track
- Walmart - Advanced Software Engineering Virtual Experience
